Experience

Amazon

New York, NY

SOFTWARE DEVELOPMENT ENGINEER II | AMAZON ADS STORES MONETIZATION

Aug 2024 - Present

- Spearheaded the migration of video ad campaigns on Amazon to use the OpenRTB native flow by designing and implementing changes across ad setup, serving, and rendering systems using Java and TypeScript, allowing video ads to blend into the homepage and preserving \$50 million yearly.
- Served as the technical POC for ads on Amazon during all high-traffic events in 2025 including Prime Day and Black Friday, implementing custom event requirements, coordinating readiness with product and sales, and resolving critical incidents during the events.
- Enabled the OpenRTB native flow on the ad sourcing system used by premium campaigns in Brazil/MENA, driving \$4 million in annual revenue.
- Launched third-party tracking functionality for native ads on Amazon so advertisers can verify impressions/views through their own providers.
- Integrated ad support into an Amazon homepage frontend component, contributing to ads using it generating over \$100 million yearly.

Mercari

Tokyo, JP

SENIOR SOFTWARE ENGINEER | TRUST AND SAFETY

Mar 2023 - Jul 2024

- Led project to reduce false positives on the service applying usage restrictions to users who repeatedly cancel transactions, allowing more users to buy/sell items and improving GMV (gross merchandise value) by over \$500,000 yearly, using Go, Kubernetes, and BigQuery.
- Oversaw the design and planning of a feature to allow users to sell age restricted items based on age verification, which would increase GMV.

Microsoft

Redmond, WA

SOFTWARE ENGINEER II | MICROSOFT EDGE PROGRESSIVE WEB APPS

Jan 2022 - Feb 2023

- Implemented browser APIs in Edge to allow developers to create Windows widgets for PWAs, installable web apps that feel/act like native apps.
- Added support for PWAs to be launched by opening URLs using C++, React, and TypeScript, helping increase Edge's market share by minutes used.
- Designed and prototyped scope extensions for PWAs in Chromium so that users can install web apps with multiple domains as one PWA.

SOFTWARE ENGINEER II | AZURE VIRTUAL NETWORKING

Aug 2021 - Jan 2022

SOFTWARE ENGINEER | AZURE VIRTUAL NETWORKING

Aug 2020 - Aug 2021

- Worked on major rewrite of the core system running on millions of servers that programs the networking info for every Azure VM, reducing average VM creation time by over 25%, using C++ and a publish-subscribe data model to get networking data stored as Protobufs.
- Launched support for accessing Azure Private Endpoints from on-premises networks through Azure ExpressRoute FastPath using C# .NET.

Amazon

New York, NY

SOFTWARE DEVELOPMENT ENGINEER INTERN | AMAZON DEMAND SIDE PLATFORM

Jun 2019 - Aug 2019

- Designed and developed a scheduling system to manage the number of tests running concurrently across the team using Java and DynamoDB.

Amazon

East Palo Alto, CA

SOFTWARE DEVELOPMENT ENGINEER INTERN | AWS DATABASE MIGRATION SERVICE

Jun 2018 - Aug 2018

- Created a notifications system to inform customers, implementing the APIs using Java and building the user interface using React and TypeScript.

Skills

Programming Languages Java, Python, JavaScript, C++, C#, Go, TypeScript

Technologies AWS, GCP, Azure, Kubernetes, Terraform, Node.js, React, Express, Flask, .NET, Jest, Pytest, JUnit, SQL, BigQuery

Projects

JikanPy Python library for the MyAnimeList unofficial Jikan API peaking at 2 million monthly downloads.

ESPN Boris Chen Tiers Browser extension injecting Boris Chen's football player rankings into the ESPN Fantasy Football website.

Education

The University of Texas at Austin

Austin, TX

B.S. IN COMPUTER SCIENCE WITH HONORS
